# Smart Contracts

How much money does your organization lose due to long and painful processes, loss of data or lack of compliance? Imagine the impact on your business when even the most complex processes are 40-60% faster, you never lose a single document and you always have a full audit trail? This is what Smart Contract Management can do for your organization.

One of the best things about the Smart Contract Management solution is that, because it is a centralized system that exists between all permitted parties, there's no need to send all the documents to all parties. It saves you time, risk and conflict. And if you store the info on the blockchain, your data is more secured than traditional systems. This is why banks and governments are turning to them.

Smart contracts Management help you exchange money, property, shares, or anything of value in a transparent, conflict-free way.

Our goal is to partner with our clients in their digital transformation journey. In this partnership, build on trust and collaboration, we can help them in moving from complex business propositions to user-friendly apps and systems that create tangible results. We care about the impact of our technology on their organization and make sure that everyone who should be involved, is involved in every step of that journey. After all, the key to a mutual success is that we both Learn, Innovate and Deliver.

## Why This Solution?

How much time and money does your organization spent on Contract Management?

### Shorter handling times

Decrease the handling time of contracts, in some cases 40-60% end-to-end time reductions were realized

### Reduce repetitive work

Empower and motivate your people and free up time for more valuable work

### End-to-end value tracking

Track the actual results of a contract in performance, progress, value, costs or revenue against your forecast

### Cost reduction

Up to 70% more efficient

### Collaborate

A process that is based on collaboration, both internal and external stakeholders

### Full Lifecycle Management

Follow the status of a contract throughout all stages of its lifecycle and automatically verify if the agreed obligations are met

### Innovate

Paperless and fully integrated with your existing systems. Minimizing manual actions, utilizing blockchain to create your own secured ledger for contracts and obligations

### Monitored timelines

A system that not only monitors timelines, but also sets actions to ensure the timelines are met

### Compliant

Full traceability of the status of and actions taken for a contract, in every stage

### Never lose a single contract

Via one central repository for all your contracts, perfectly organized and easy to access, it is literally impossible to ever lose a contract. Never lose money via this solution

### Always in control

After signing this process do not stop. Our contract process will monitor and automatically respond to contracted events. Or start an extension process on a contract

# 3

## Who will Benefit

*The smart contract management solution is a generic solution that can be optimized for small, mid-sized and large enterprises, via adjusting configuration and customization settings.*

### Sales & Procurement Departments

Boost the collaboration between your Sales, Legal and Procurement departments. Work together with your vendors and clients on simple and on the more complex contracts. Even contracts between multiple parties are supported, involving all relevant stakeholders in the process and providing them with access to the information that they need. After contract signing, the solution will monitor and execute the agreed financial transactions at the moment the conditions are met.

Standard dashboards and in-detail reporting allowing Legal, Procurement and Sales Management to track the progress and performance of all of your contracts.

### Law Firms

Close contracts with your clients in days instead of weeks. Collaborate with corporate clients on more complex contracts, kick-starting with one of the many pre-configured templates for law firms. Use one of the standard contracts for standard work, reducing the amount of repetitive and manual work to a minimum.

Set and monitor the KPI's and obligations per contract to gain insight in the performance of your organization and your clients, allowing you to continuously improve your business.

Last but not least, offer a unique solution towards your clients that will increase their customer experience.

**Transparent
